TAPERED DOWNSPRUES

STANDARD AND REDUCING
T - SECTIONS

BENDS
90° AND 45°

SLOTTED INGATES

- ✓ *A flexible and comprehensive range of ceramic products for the foundry industry conforming to high industry standards and made under TQC manufacturing procedures*
- ✓ *A **NEW** high alumina compound which provides higher resistance to thermal shock, cracking, spalling and abrasion and easier cutting. It also offers lighter weight and improved strength for ease of assembly and improved internal surface finish promoting streamlined metal flow and reduced contaminant pick-up*

The **EZY FLO** range is produced in Australia by **COOINDA CERAMICS**

We are constantly working with the foundry industry to improve and extend our product range. Direct access to our comprehensive in-house **Tooling Manufacture and Design, Engineering** and **Research and Development** facilities means we can quickly develop solutions for your specific needs.
